INTEREST TABLES.
(SEVEN PER CENT.)

IN WHICH ARE SHOWN

THE INTEREST ON ANY SUM

FROM ONE DOLLAR TO FIVE HUNDRED DOLLARS CONSECUTIVELY,

FOR ANY LENGTH OF TIME,

FROM ONE DAY TO THREE HUNDRED AND SIXTY DAYS, BY DAYS,

AND ALSO

From One Day to Two and a Half Years, by Years, Months, and Days.

BY THE ADDITION OF TWO SUMS ONLY,

WHICH ARE BOTH TAKEN FROM THE SAME TABLE.

BY GEORGE OATES,

AUTHOR OF "SIX PER CENT INTEREST TABLES," ETC.

Entered according to Act of Congress, in the year 1850,
By GEORGE OATES,
In the Clerk's Office of the District Court of the United States for South Carolina.

P R E F A C E.

IN preparing the following *Interest Tables*, the Author has attempted, and he hopes successfully, to produce such as combine the two important requisites, *simplicity and comprehensiveness*, in a greater degree than has hitherto been attained.

There are two modes of computing Interest; one by days, and by months of 30 days, (making the year to consist of 360 days only,) which is adopted principally by banking institutions, which are allowed by their charters to charge one-half of one per cent interest for every 30 days; the other is by years, months, and days, each month being the twelfth part of a year of 365 days; while the days (the fractional parts of a month) are calculated at the rate of 360 days to the year, which is legal throughout the United States. A series of tables, applicable to both of these modes of calculation, is now for the first time presented.

They give the interest on any sum, from One Dollar to One Thousand Dollars consecutively, for any length of time from 1 day to 360 days, by the first mode of calculation, or by the

second mode, from 1 day to $2\frac{1}{2}$ years, by the addition of *two sums only*, both taken from the same table, and which are both seen at a glance.

Example of the First Mode.—Wanted the interest on \$479 for 195 days. Turn to the table headed \$479, and on a line with figure 6, will be found 180, (6 months of 30 days to the month making 180 days,) the interest on which, found in the second column, (months,) is $16.\overset{\$}{\underset{c.}{76}}.\overset{m.}{5}$; then turn to figures 15, opposite to which, in the first column, (days,) is $1.\overset{\$}{\underset{c.}{39}}.\overset{m.}{7}$: together \$18.16.2, say \$18.16,—2 mills being less than half a cent are thrown aside. To ascertain how many months of 30 days there are in 276, or any other number of days, divide the tens and hundreds by 3, for the months, and the remainder will be days, thus: $\frac{87}{3} = 29$, $\frac{195}{3} = 65$, $\frac{253}{3} = 84$, or $\frac{329}{3} = 109$ days, divided by 3 will give 2.27 , 6.15 , 8.13 , 10.29 ,—say 2 months and 27 days, 6 months and 15 days, &c., &c.

Example of the Second Mode.—Wanted the interest on \$476 for 1 year, 5 months, and 21 days. Turn to the table headed \$476, and in the second column, (months,) opposite 17, (seven-

P R E F A C E .

teen months, being 1 year and 5 months) will be found $\begin{smallmatrix} \$ & c. & m. \\ 47.20.3 \end{smallmatrix}$; then turn to the first column, (days,) and opposite 21 is found $\begin{smallmatrix} \$ & c. & m. \\ 1.94.4 \end{smallmatrix}$: together \$49.14.7, equal to \$49.15,—seven mills being more than half a cent are reckoned one cent; (in all cases, where the number of mills is less than 5, they are thrown aside, but when they are 5 or more, they are called one cent.) These two examples explain the whole method, the only difference being in the amount to be sought for, and the time for which interest is to be charged.

As to the correctness of these Tables, the Author believes they will be found as free from error as those he published six

years since, and in which, so far as he knows, not a single error has been discovered.

In times like the present, when steam, magnetism, and other powers, have done so much to facilitate business transactions, it may appear almost absurd to claim consideration for the humble assistance that these Tables may afford, yet the Author hopes and believes, that the mercantile community will find them equally useful in their way, with many other time and labor saving inventions, that have been favored with general approbation.

RECOMMENDATIONS.

I have examined Mr. Geo. Oates' Tables of Interest at Six and Seven per cent, and recommend the same to all Merchants and Public Institutions, as one of the most simple and expeditious modes of calculating interest, on large and small amounts. The price of the work being very reasonable, is also greatly in its favor.

PHILADELPHIA, Dec. 27, 1849.

A. HART, 4th and Chestnut-sts.

I fully concur with Mr. Hart in what he has stated in regard to Mr. Oates' new Interest Tables.

J. B. TREVOR, *Cashier Phila. Bank.*

We cordially agree with the above recommendations.

BROWNS & BOWEN.	DAVID S. BROWN & Co.
J. HOCKLEY,	MYERS, CLAGHORN & Co.
(<i>Cash. Bank of N. Amer.</i>)	SLEEPER & FENNER.
E. W. CLARK & Co.	

At the request of Mr. Geo. Oates, we have examined his Interest Tables, and are satisfied that they are a decided improvement over any we have yet seen, combining simplicity with comprehensiveness.

BOSTON, Jan. 3, 1850.

A. & A. LAWRENCE & Co.	J. W. PAIGE & Co.
F. HAVEN,	SAMPSON & TAPPAN.
(<i>Pres. Merchants' Bank.</i>)	J. E. THAYER & BRO.
JAMES DODD,	GILBERT & SONS.
(<i>Cashier Bank of Mass.</i>)	

Mr. George Oates has exhibited to me some Tables of Interest which, in my opinion, possess merits of no ordinary kind, and which he is about to publish in a convenient form.

In the arrangement of these Tables, ingenuity, comprehensiveness, and simplicity are most happily combined, and they cannot fail to attract the notice and patronage of our mercantile community.

NEW YORK, Jan. 5, 1850.

JOSEPH FOWLER.

We concur with the above.

GENERAL RULE.—The number of days from *any* day in a month in the first or left-hand column, to the *same* day of any *other* month running horizontally, is specified by the figures placed under *that* month.

Examples.

How many days from the 10th January to the 10th July?

Turn to January in the left-hand column, and move from left to right past February, March, April, May, and June, to July, under which are found the figures 181,—the required answer.

Find the number of days from the 7th April to the 19th November.

From the 7th April to the 7th November are 214 days; to these add 12, the difference between 7th and 19th, and 226 is the number sought.

Find the number of days from 27th March to the 14th September.

From 27th March to 27th September are 184 days; from these deduct 13, the difference between 14th and 27th, and the number sought is 171 days.

 To find the number of days from a given date to a preceding one, instead of making a *retrograde* calculation, simply *reverse the question*.

Example.—How many days from the 25th December to the 14th May preceding?

From 14th *May* to 14th *December* are 214 days; to these add 11, the difference between 14th and 25th, and 225 is the answer.

N.B. In leap-years *one* must be added to the number, after the 28th February.

DIRECTIONS.—The large left-hand figures give the number of cents: the top figures (1 to 30) give the days and months. The interest for days is in old fashioned figures and *above* the line, (opposite to which the number of cents is placed,) and that for months, is in modern figures and *below* it.—Find the interest on 85 cents for 6 months and 19 days: turn to the left-hand figures for 85, and under figure 6 at the head (*below* the line) will be found 3.0—say 3 cents; then turn to figures 19, and *above* the line will be found 3—say 3 mills: together, 3 cents and 3 mills, the interest required.
